[CR16] Students/teachers have access to a college-level U.S. government and politics textbook.

Supplemental Readings

The primary text will be heavily supplemented by outside readings, including the 15 required Supreme Court cases and nine foundational documents which will all be assigned during the course. **CR10: foundational documents**] [CR15: Supreme Court cases]

In addition to the required cases and documents, recent articles regarding political science concepts and current political issues will be provided to students to supplement the primary text. Links to the supplemental readings will be posted on the course website or provided to students in hard copy.

[CR10] —The course provides opportunities to analyze and interpret qualitative sources (primary and secondary sources including the nine required foundational documents) to explain how they relate to political concepts.

[CR15] — Students are provided opportunities to analyze the 15 required Supreme Court cases as described in the *AP U.S. Government and Politics Curriculum Framework* and connect them to other non-required landmark cases.

Major Class Activities

Current events presentations: Students, individually or as a pair, will prepare a current events presentation that they will share with the class at the start of their assigned week. The presentation must include at least one story that links one or more of the big ideas to each of the five units in the *AP U.S. Government and Politics Curriculum Framework*. The current events presentation also must include at least one relevant visual source (photo, political cartoon, or infographic) for each story with a caption that explains its connection to the big idea and/or unit that story covers. [CR11]

[CR11] —The course provides opportunities to analyze and interpret visual information to explain how the elements of the visual illustrate or relate to political principles, institutions, processes, and behaviors.

Analytical paper assignment: Students will be required to write three analytical papers about important topics in United States government and politics. These papers will be due on varying dates during the semester. Each paper must be no more than four pages in length. In each paper, the students must briefly summarize the assigned readings, connect the readings to the current unit of study (how they do this will vary depending on the resources provided for each paper and the unit of study in which it is due), and make a connection between the readings and a current political issue. One to two analytical paper assignments will require students to also examine how the assigned article and a required case/foundational document corroborate or contradict one another. **[CR7] [CR12]**

[CR7] —The course addresses the big ideas by connecting enduring understandings across one or more units.

[CR12] —The course provides opportunities to apply course concepts and Supreme Court decisions in real-world contexts or scenarios.

Debates: Students, in teams of three, will participate in a debate about a current public policy or issue in American government and politics. Each team will get a five-minute opening statement, a five-minute cross examination period, and a five-minute closing statement. Students must also have a visual that helps support their main arguments. This visual can be a chart, graph, table, political cartoon, or infographic. Students will analyze the visuals presented by other teams as part of the debate. Finally, each team is responsible for providing an annotated works cited page of the resources used to develop their arguments and questions. **[CR11]**

[CR11] —The course provides opportunities to analyze and interpret visual information to explain how the elements of the visual illustrate or relate to political principles, institutions, processes, and behaviors.

Thinglink assignment for required court cases: In pairs, students will create a Thinglink interactive presentation for one of the 15 required Supreme Court cases using Thinglink.com. Their interactive presentation must include a summary of the constitutional issue involved in the case, a summary of the holding of the case, any significant dissents in the case, and connections to at least two similar cases (acting as precedent or overturning the original decision). In addition to the previous requirements, each student's Thinglink should contain relevant visuals, such as political cartoons, photographs, or tables/charts and a caption that explains their relevance to the case. **[CR11] [CR12] [CR15: activity]**

[CR11] —The course provides opportunities to analyze and interpret visual information to explain how the elements of the visual illustrate or relate to political principles, institutions, processes, and behaviors.

[CR12] —The course provides opportunities to apply course concepts and Supreme Court decisions in real-world contexts or scenarios.

[CR15] — Students are provided opportunities to analyze the 15 required Supreme Court cases as described in the *AP U.S. Government and Politics Curriculum Framework* and connect them to other non-required landmark cases.

[CR1] —The course includes the Foundations of American Democracy Unit and addresses all related big ideas (BIs) and enduring understandings (EUs).

Instructional Activities for Unit 1

3-2-1 Activity/Seminar. Using the 3-2-1 seminar protocol, students discuss the "How American Politics Went Insane" article from *The Atlantic*. This will allow students to connect the current state of politics to important Unit 1 concepts such as popular sovereignty, republicanism, and social contract theory of government. This is a high interest article that will help "hook" students at the start of the semester. [CR10: activity] [CR12]

[CR12] —The course provides opportunities to apply course concepts and Supreme Court decisions in real-world contexts or scenarios.

Students brainstorm a list of things they believe government should do by asking the question, “What should government do?” Make a list of student responses on the board. Use this list to facilitate a discussion about order, liberty, and equality. Then share the Preamble to the Constitution and have students link their list to the language in the Preamble. (EU LOR-1)

ThingLink Court cases assignment. See description in the major class activities section above.

Debate. Two teams of three students each debate the resolution, “States have exceeded their authority in legalizing recreational marijuana use, and the federal government should reassert its national supremacy over drug policy.” (EU CON-2) **[CR6] [CR12]**

[CR6] —The course integrates public policy within each unit.

[CR12] —The course provides opportunities to apply course concepts and Supreme Court decisions in real-world contexts or scenarios.

(EU PMI-1)

Free-Response Question (FRQ). Students respond to a textual, qualitative-based FRQ comparing the *McCulloch* and the *Lopez* decisions. Checks and balances role play. Using a lesson from the National Constitution Center’s Separation of Powers Lesson Plan as a model, students engage in a simulation in which they develop a plan of action to ensure the creation/implementation of a policy based on the powers given to their assigned branch of government (legislative, executive, judicial). In addition to developing this plan of action for their own goal, students must develop a plan to either support or oppose another branch’s goal. (EU PMI-1) [CR7] [CR12]

Watch “The Stackhouse Filibuster” (Season 2, Episode 17) from *The West Wing*. Political concepts examined in this episode include the filibuster, the White House Staff, the presidential relationship with the press, and how legislation is developed by both the presidency and Congress. *The West Wing* is available on both Netflix and iTunes. (EU CON-3, CON-4)

Students complete at least two of the scenarios in The Redistricting Game found online. This is an online simulation that allows the students to draw and gerrymander imaginary congressional districts. The simulation has four different scenarios, each with a different take on the process of redistricting and gerrymandering. As students complete each of the scenarios, they respond to a set of questions about the process and the difficulties they encountered. All students must do scenario 1, a straight redistricting scenario. The second scenario is up to them. In addition to completing two of the scenarios, students read about proposed changes to the redistricting process and respond to these proposals. (EU CON-3) [CR12]

[CR9] —The course provides opportunities to analyze and interpret quantitative data to explain what the data implies or illustrates about political principles, institutions, processes, and behaviors.

Students take the *Pew Research Center's* Political Typology quiz. This quiz places the students into one of nine political typologies – it divides the traditional left/right spectrum into several subgroups (four on each side of the center and one for non-engaged quiz takers). After the students have completed the quiz, they write their names on the class political spectrum, as does the teacher. Then as a class they discuss how the class does or does not reflect the larger community and what might account for the class's overall political ideology. (EU MPA-1)

Analytical paper "Polarized or Sorted? Just What's Wrong with Our Politics, Anyway?" and "America's Missing Moderates: Hiding in Plain Sight" due. The purpose of this analytical paper is to allow students to compare the competing views on partisan polarization in American political culture. Two teams of three students each debate the resolution, “Demographic changes represent a threat to the long-term electoral success of the Republican Party.” (EU MPA-1, PMI-4, MPA-3) **[CR6]**

[CR6] —The course integrates public policy within each unit.

Class poster presentations of party platforms. Divide the class in half – one half examines the Democratic Party platform and the other half examines the Republican Party platform. Within each platform, students pair to explore a particular topic, such as education, defense, entitlement spending, etc. and create a post that explains the party’s policy proposals for that particular topic. Students then present their findings to the class. As a follow-up homework assignment, students then research public opinion polls on their issue and write a summary of how the American public feels about their issue and evaluate whether or not their assigned party reflects the American public. Finally, students must identify a policy from their assigned platform and determine if it has been implemented and how. (EU PMI-4, MPA-2) **[CR6]**

[CR6] —The course integrates public policy within each unit.

Students respond to a quantitative data FRQ regarding changing demographics in the United States. Students have to interpret data from the U.S. Census Bureau regarding racial and age composition of the United States and how they are changing. Students also link these demographic changes to representation in Congress. The final section of the FRQ will require students to assess the potential impacts of these changes on the two political parties and the policies each party promotes. (EU PMI-4, MPA-3) **[CR6]**

[CR6] —The course integrates public policy within each unit.

To better understand how state election laws impact voter turnout, students find voter turnout data from a state that has passed a strict voter ID law in the 21st century, such as Wisconsin, Indiana, or Texas. Prior to their research, students formulate a hypothesis about the impact voter ID laws have on voter turnout. Students then research voter turnout stats from the presidential election prior to the passage of that state's voter ID law, and the presidential election immediately after the passage of voter ID laws. Students break the data down by major demographic groups, such as race, age, and education. Students write a summary of their findings, including an evaluation of their thesis and reasons why their thesis was correct/incorrect. (EU MPA-3) [CR6] [CR8] [CR9] [CR13]

The purpose of this analytical paper is to have students examine the original design and purpose of the Electoral College, and then assess how it works in modern U.S. politics, with special attention paid to the 2016 election. In this paper, students must examine the various proposals to reform the Electoral College and assess the advantages and disadvantages to each, explaining why the current system should either be maintained, revised, or completely eliminated and replaced with election by national popular vote. After the lesson regarding the theory of critical elections, students use presidential election data from the 20th and 21st centuries to classify each election as either a critical election or a deviating election. (EU PMI-5) **[CR9]**

[CR9] —The course provides opportunities to analyze and interpret quantitative data to explain what the data implies or illustrates about political principles, institutions, processes, and behaviors. [CR13] —The course provides opportunities to develop an argument in the form of an essay, supported by relevant evidence, about a concept described in the *AP U.S. Government and Politics Curriculum Framework*. After the lesson on the media as a linkage institution, especially the part about partisan media and social media, students complete a media analysis assignment. Students are assigned to read two articles about a specific policy issue in the United States. One article is from a conservative source and one from a liberal source. They then analyze the two sources – making note of the facts provided, the viewpoints expressed in each, and other differences between the two sources. Political Science Research Project. After reading “How to Spot Fake News” at FactCheck.org as homework, students work in groups to identify the fake news stories in their assigned packet (the packet contains both legitimate and fake news stories). Students first develop a list of indicators which they can use to determine if each story is fake news or not and then they conduct a content analysis of each report. Finally, they share the results with the class and assess the extent to which political science research provided in the course can provide guidance for discerning the difference between valid and invalid news stories. (EU PRD-3) **[CR14]**

[CR14] — Students are provided with an opportunity to engage in a political science research or applied civics project tied to the *AP U.S. Government and Politics Curriculum Framework* that culminates in a presentation of findings.

Certifications: Since this is an academics course, there are no Certifications available for students to obtain.

Course Grading: It is important for you to monitor your grades and assignments. If your grade is not at least a ‘C’ average, I will need to make a phone call home. Grading policies for each 6 week grading period:

Major Grades: 50%	//	Daily Work 50%	//	Overall Grades:
90 – 100% = A		80 – 89.9% = B		70 – 79.9% = C Below 70% = F

Students with a grade of “I” or with a grade of 69 or below are ineligible for extracurricular activities (TEC 33.081).

An ‘Incomplete’ (I) reflects incomplete student work and is not considered an academic grade. * See MISD Board Policy EIC (Local)

Weighted Credit: Per MISD Board Policy EIC (LOCAL): The District uses a weighted numerical grading system. In calculating GPA, ten points (per semester) shall be added to a student’s average in Advanced Placement (AP), Pre-AP, Academic Decathlon, and courses considered to be District-approved college level dual credit courses. All other courses shall not receive weighted points for completion. No weighted credit point shall be added for grades lower than 70. Weighted grading shall be reflected in the student’s GPA and not numerically per course on either the student’s report card or transcript.

Assignments/Quizzes/Tests: Six weeks grades shall be obtained by averaging student work as detailed below. Daily assignments may count more than once, but no more than twice. MISD Curriculum Based Assessments (CBA) are calculated as part of the daily work category.

A minimum of 8 grades and two forms of major assessment will be given for each 6-week grading period. Student grades will be posted in the Skyward Parent Portal within 5 business days for daily grades and major grades. Special consideration is given to major projects, including lengthy writing assignments. Be prepared to complete these assignments when they are due on a timely basis.

Semester Grades: Semester grades are computed by averaging the numerical grades recorded for each of the three six week reporting periods and the course semester exam. Each six-week grading period and semester exam contributes to your overall grade. Here is a breakdown of each 6 week grading period: 1st 6 weeks = 26%; 2nd six weeks = 27%; 3rd six weeks = 27%; Semester exam = 20%.

Year Long Courses: Course credit is awarded with a grade of 70% of higher. If a student fails either semester of any MISD yearlong course and passes the opposite semester with a high enough grade for an overall average of 70% for the full course, full credit will be granted. In this situation, for averaging to occur, the courses must have been taken during

the same school year and in consecutive semester. Example: Final score for 1st semester = 60%. Final score for 2nd Semester = 80%. $(80\%+60\%)/2=70\%$. This example would award course credit since the average is 70% overall.

Semester Exam: Each semester, specific exam schedules are designated for MISD high schools and as related to dual credit courses. These schedules must be followed. Neither mid-term nor final exams are given early. If the student is absent on the day of an exam he/she will take the exam at a school designated time and date. A student is expected to contact the course teacher to schedule a makeup time for a **first semester exam** missed because of a student absence and the school-counseling department to schedule a make-up time for any **second semester exam** missed because of a student absence.

Student Work: The amount of time to complete assignments may vary with each student's study habits, academic skills and selected course load. This includes major projects such as research reports, book reports, major essays, and other assignments teachers designate as major projects.

UIL Eligibility (No Pass/No Play): Semester grades are computed by averaging the numerical grades recorded for each of the three six week reporting periods. Each six week grading period will stand alone for eligibility purposes. A student who is declared academically ineligible after a six week grading period will be able to regain eligibility if all of the student's grade averages are 70% or higher at the subsequent (next) 3-week grade reporting period. ** See MISD Board Policy FM (LOCAL) for exempt courses.

Re-takes: Students who fail a major test/assessment (below 70%) will be allowed to retake or correct up to a 70% grade. This **does not include** semester examinations. Students are expected to make arrangements with the teacher to retake or correct a major test/assessment. Students are encouraged to participate in tutoring opportunities before retaking a test. All retakes or corrections **must** be completed prior to the end of each six-week grading period unless the student is afforded time, after the six-week grading period, as a result of the district's absence/make-up guidelines. See UIL ("No Pass/No Play") guidelines for additional information related to grades and UIL Eligibility.

Late Work: Teacher shall designate due date and time for assignment (Beginning of class period, End of class period, designated time of day). If student fails to meet the due date and time, then the student has till the next class period (next A day or B day) to turn in assignment to be considered for up to one class period late. Students shall be assessed a penalty of no more than 30 points per day for up to one class period late. A score of a zero may be given for work turned in after one day late.

Missed Exams or Assignments: Teacher may assign the student makeup work based on the instructional objectives for the subject or course and the needs of the individual student in mastering essential knowledge and skills or in meeting subject or course requirements. Students shall be responsible for obtaining and completing all makeup work in a satisfactory manner and within the time specified by the teacher. When absent, the student is afforded the number of days missed plus one additional day to turn in makeup work. [A/B Block Example:

A student misses Monday and Tuesday of the week and he/she returns on Wednesday of that same week. Student work from Mondays absence would be considered late after Friday and student work from Tuesdays absent would be considered late after the following Monday.] Students who do not make up assigned work within the time allotted by the teacher will receive a grade of zero for the assignment.

Students are encouraged to speak with their teacher if they know of an absence ahead of time, including absences for extracurricular activities, so that the teacher and student may plan any work that can be completed before or shortly after the absence.

Students will be permitted to make up tests and to turn in projects due in any class missed because of absence. Teachers may assign a late penalty to any long-term project in accordance with time lines approved by the principal and previously communicated to students.

See UIL ("No Pass/No Play") guidelines for additional information related to grades and UIL eligibility.
